

M153

Valvola a flusso avviato a vite esterna tradizionale a baderna

Streamlined flow valve outside screw
traditional type

PN 25

GHISA SFEROIDALE | NODULAR CAST IRON

Caratteristiche | Features

Applicazioni

Valvole per acqua calda e/o surriscaldata, vapore, aria, fluidi diatermici, ecc.

Trovano impiego negli impianti di trasmissione calore, centrali termiche, caldaie e serbatoi, impianti di teleriscaldamento, applicazioni con olio diatermico, ecc.

Applications

Valves for hot water and/or overheated water, steam, air, diathermic fluids, etc.

They are suitable for heat transfer systems, thermal power stations, industrial boilers and tanks, district heating plants, diathermic oil installations, etc.

Valvola a flusso avviato a vite esterna, tradizionale a baderna

Streamlined flow valve outside screw, traditional type

M153

Materiali | Materials

POS	COMPONENTE	COMPONENTS	MATERIAL

Limiti di utilizzo | Limits of use

È necessario l'uso dell'otturatore equilibrato quando la pressione di esercizio supera i seguenti valori:
It is necessary to use the balanced disc when the working pressure is over the following values:

DN	150	200
PRESSIONE PRESSURE [bar]	21	14

NOTA: Utilizzando una valvola con otturatore equilibrato è indispensabile installarla al contrario, cioè con la pressione sopra l'otturatore
NOTE: When using a valve with balanced disc, it is essential to install it in reverse way, that is with the pressure on the disc

Varianti | Variations

M153 R

Otturatore parabolico
Parabolic disc

M153 T

Otturatore con guarnizione intercambiabile di PTFE (max 180°C)
Interchangeable PTFE gasket on the disc (max 180°C)

M153 RT

Otturatore parabolico con guarnizione intercambiabile di PTFE (max 180°C)
Parabolic disc with interchangeable PTFE gasket (max 180°C)

M153 EQ

Otturatore equilibrato
Balanced disc

M153 A

Otturatore semi-automatico con funzione di valvola di ritegno e chiusura
SDNR disc (check + on/off function)
